

## Finns Teach Better Than You

C  
Finns score the best on any global test.  
C                                    F                                    C  
Helsinki to Lapland what's the reason they do?  
C                                    F  
Half the school day they do nothing but play,  
C  
The Finns must teach much better than you.

*Chorus:*

C                                    F                                    C  
Oh, the Finns teach better than you.  
C                                    F                                    C  
Finland tops the world in more ways than one.  
C                                    G                                    F                                    C  
Oh, the Finns teach better than you.  
C                                    F                                    C  
How else do those Finns get any learning done?

No homework, math drills, or standardized tests.  
Their school year and school day are shorter than ours.  
Not until age seven does their schooling begin.  
Their lunch breaks and recesses go on for hours.

*Chorus:*

*Music*

*Chorus:*

Private schools taboo; Kids are treated the same.  
Two or three languages each Finn can speak.  
Cooking, art, and sports just to rub it in.  
The kids get music five times a week.

*Chorus*

*Chorus*

Oh, the Finns teach better than you.  
Finland tops the world in more ways than one.  
Sick and tired of hearing the way they do.  
Those Finns must teach better than you.

*Chorus repeat:*
